## MARKET AT STANDSTILL

Break in Wheat Had Little Effect—Traders Market Only—Looks as if We are in for a Period of Dullness of Some Duration.

(By I. N. Kinsey)  
GLOBE, May 14.—Walker Brothers of New York say: Market opened steady and dull. Trading all day was light. The break in wheat did not have much effect. In the afternoon market became heavy and sold off. It looks as if we were in for a period of dullness and there does not seem much inducement for public to get in at all. Money at the moment is easy with little demand for it.

Paine of Boston says: There was no change in the market today. Traders tried to rally Range and North Butte again this forenoon, but no buying came in and they were left with the stock on their hands tonight. A rumor that Mohawk dividend may be increased was circulated, but do not believe it and believe stock high, compared to Quincy, Osceola and Range.

## STOCK MARKET EXTREMELY DULL

Trading Was Professional and Changes Narrow—No Immediate Prospects of a Revival of Interest—Look for Collapse in Wheat Speculation.

(By H. H. Bru Co.)  
GLOBE, May 14.—The stock market today was featureless except for the extreme dullness which prevailed through the session. Nothing has transpired of importance to influence prices of securities. Stocks are in strong hands and as there is no pressure to sell, the market is simply a waiting one and its ultimate course will be decided by the changes in the condition of crops and by the course of the money market.

Stocks generally opened higher, but sold off during the morning session and closed at fractional declines from Monday's opening figures. We still advise the purchase of the dividend paying copper stocks on all weak spots and the taking of moderate profits on any advance.

Considerable trading is done in Globe-Arizona and Inspiration stocks. Eleven thousand shares changed hands at our office today and ten thousand shares of Queen Copper stocks were sold. While these stocks are not among the high priced securities, some money may be made in a short time, as these mines are all developing and shipping good ores.

Van Wagenen makes a specialty of fitting. Satisfaction our motto.

Nothing but pure cream used in making our ice cream. Try a quart at the Opera House Confectionery.

**The Great Bigness of Texas**  
Texas is the biggest state in the Union—don't talk back to me; I know. The upper part of the Panhandle of Texas is nearer to Chicago than it is to Galveston. Texas is as wide as the distance from Chicago to Boston, or from St. Louis to New York City. That is to say that from Texarkana to El Paso it is 1,100 miles. Texas has 3,000,000 folks, 10,000,000 cattle, 12,000,000 sheep and 3,000,000 horses. One horse, you see, for every man, woman and child in the state. People who have not seen the southwest during the past five years cannot by any description realize its progress. What is known as the "Santa Fe country" can feed the world. Six years ago you could buy in Texas 1,000 sheep for \$1,000. Now 1,000 sheep will cost you \$8,000. The real crop in Texas, however, is not wool, but cotton. The cotton crop in Texas for the year 1906 was worth over \$200,000,000 in cold cash. They raise a bale of cotton on an acre, and a bale of cotton is worth \$60.

Texas has the second most important shipping port in America, and if things continue going as they have for the past five years, in ten years more the shipments from Galveston will exceed in value the combined exports of Boston and New York.—Elbert Hubbard in the Philistine.

## THE SAFFORD CREAMERY

Institution Begins Its Second Year Under Prosperous Conditions

The editor of the Guardian was shown through the Safford creamery Wednesday by Superintendent John B. Miller, and given many facts and figures to show that the institution is in a flourishing condition. The creamery was launched a year ago today, and is now fairly established, with every prospect of a prosperous career. A new store room is being built which will be imperious to heat, and which will have a capacity of several tons of butter. It will be kept at a Greenland temperature by four walls of ice. It has forty milk furnishes who furnish about 2,500 pounds of milk daily, and thirty more who have hand separators and who supply about 250 pounds of cream each day. The creamery churns every other day and produces about 1,500 pounds of the finest butter ever seen each week. The farmers have averaged over \$4 per month per cow, which is greater than the average of picked herds in many eastern dairy centers. Some of the farmers keep up a remarkably high average of butter fat, showing excellent care of the cows and high-class stock. On Monday last the receipts of cream were the largest for any day yet, totaling 900 pounds, containing 300 pounds of butter fat.

The capacity of the churn is 600 pounds.

The butter finds ready sale throughout the southwest, and Safford is rapidly gaining fame for the excellence of its dairy product.

Messrs. Olney & Prina, the proprietors, are to be heartily congratulated on the success of their venture.

Try Melrose Rye if you want something extra fine; splendid for medicinal purposes and as pure a brand as can be had anywhere. Bankers' Garden.
